

SIMS Avance Sample Configurations

Configuration:	SIMS R300 Good Configuration
Recommended Use:	SIMS Site on CSM, SIMS II or SIMS III w/proprietary database and has less than 5,000 active accounts.
Specifications:	Dell PowerEdge R300, Quad Core Xeon 2.5ghz Processor 2gb RAM, Single 73gb 15k rpm SAS drive Single power supply
Approximate Server Cost:	\$1,300 each *

Configuration:	SIMS R300 Better Configuration
Recommended Use:	SIMS Site on CSM, SIMS II or SIMS III w/proprietary or SQL database and has less than 20,000 active accounts.
Specifications:	Dell PowerEdge R300, Quad Core Xeon 2.5ghz Processor 4gb RAM, Dual 146gb 15k rpm SAS drives Dual power supplies
Approximate Server Cost:	\$1,800 each *

Configuration:	SIMS 1950 Good Configuration
Recommended Use:	SIMS Site on CSM, SIMS II or SIMS III w/proprietary or SQL database and has less than 50,000 active accounts.
Specifications:	Dell PowerEdge 1950, Quad Core Xeon 2.5ghz Processor 4gb RAM, Dual 146gb 15k rpm SAS drives Dual power supplies
Approximate Server Cost:	\$2,000 each *

Configuration:	SIMS 1950 Better Configuration
Recommended Use:	SIMS Site on CSM, SIMS II or SIMS III w/proprietary or SQL database and has more than 50,000 active accounts.
Specifications:	Dell PowerEdge 1950, Dual Quad Core Xeon 2.5ghz Processors 8gb RAM, Dual 146gb 15k rpm SAS drives Dual power supplies
Approximate Server Cost:	\$2,500 each *

* Prices listed are approximate and for comparison purposes only. Prices are subject to change without notice. Before placing an order for hardware you should always have SIMS review the configuration to make sure no changes are needed. Even if SIMS reviews your quote, we do not accept any liability for the suitability of the configuration but we will point out any problems we find.
